PEOPLE COUNTING

WIRELESS PEOPLE COUNTER

A Plug & Play People Counting system which requires only a power socket and access to a PC. The People Counter can be placed above any doorway, or whereever you want the counting to be done. It detects/counts all visitors, and is sending the results wirelessly to your PC or laptop.

This flexible system can be placed anywhere in your store and sees the way customers move: Get the most out of your instore marketing actions!

MTC EAS puts great emphasis on the fact that it should be simple and logical to obtain the relevant information. With the included software the reports and graphs can be downloaded without specific knowledge of IT.
